Part One, you will hear a woman talking to a doctor about the problem with her eyes. First, you have some time to look at questions, one to four. Now listen carefully and answer questions one to four. Good afternoon. Take a seat.

0:42

Oh, thank you, Dr. Jackson.

0:44

How can I help you?

2

Speaker 2

0:45

I'm feeling a bit unwell these days. I hope you can give me some advice.

1

Speaker 1

0:50

Okay, could we start off with some basic details so that I can fill in the patient for sure. First of all, what's your full name, please?

0:59

It's Anu Atkinson.

1:02

Could you spell your family name?

2

Speaker 2

1:04

A T K. I n s o n. Atkinson.

1:09

Do you know your postcode?

2

Speaker 2

1:11

Yes, I think it's e l 214. F B? Hmm, let me check. Oh, sorry. It's actually e l 14 to be F.

1:25

Thanks. And where are you living now?

1:27

At the moment? I'm living with my parents on Queens Avenue.

1:31

Okay, got that. And your date of birth?

1:34

October 1 1986.

1

Speaker 1

1:38

Oh, what a coincidence. It's my birthday, too. But I was born in 1984. Do you have a telephone number that I can contact you with?

2

Speaker 2

1:47

Yes, it's 875934. But I'm out and about a lot in the afternoon and evening.

1

Speaker 1

1:54

So would the best time to ring up in the morning? Yes. Fine. Got that. Before you hear the rest of the conversation, you have some time to look at questions five to 10. Now listen carefully, and answer questions. Five to 10. Now, what exactly brings you here?

2

Speaker 2

2:50

Well, my eyes seem to have some problems whenever I spend more than half an hour reading books or working on the computer.

1

Speaker 1

2:57

Hmm, I see. Is this a new problem or an old one? I mean, has it been happening for a long time?

2

Speaker 2

3:04

No, it started just three days ago. Oh, no. I think it was five days ago in the gym after I played badminton.

1

Speaker 1

3:12

So it was after you play badminton? What is the symptom? Exactly.

2

Speaker 2

3:17

I see these flashing lights. I can't figure out what happened. Do you know what it is?

1

Speaker 1

3:23

I didn't know that either. At the moment. What was the condition of the room where you played badminton? Was it very dark?

2

Speaker 2

3:32

Oh, it was very bright. Sometimes I couldn't even open my eyes. Since then I haven't been able to see things clearly.

1

Speaker 1

3:39

Oh, that might be the reason. And have you ever been treated before for anything like dizziness?

2

Speaker 2

3:45

Well, I went into Central Hospital last month because of severe headache. And they kept me in for observation for a couple of days, but they couldn't find anything wrong.

1

Speaker 1

3:54

Okay, I'll make a note of that, too. Thank you. I think I've got all the information I need right now. And there are two suggestions for you. One is that you should take a good rest. If you find yourself looking at a screen for too long, you should look away focus on a point in the distance for approximately 10 to 20 seconds and then focus on something closer to you. Repeating this a few times should keep your eyes from getting tired.

4:24

Thanks. And what about the second one?

1

Speaker 1

4:27

I'll give you some eyedrops. You can use it before bed. That should reduce levels of eyestrain. Here's the prescription if the situation doesn't improve in a week, come back and see me again.

2

Speaker 2

4:40

I see. Thank you for your advice. I'll give it a try. Goodbye.

1

Speaker 1

4:45

Bye. That is the end of part one. You now have one minute to check your answers to part one.
